CHEAT SHEET: No Idea how to choose??You should check the website at www.gsmcommander.com for proper info, but here is the "low-down" for reference..

GC0648-4G	Our most popular unit, able to perform a host of interesting logical programming tasks. It supports analog expansion, GPRS/LTE functionality and variables (to name a few). Provides 64 behaviour statements, expandable to 22xInputs / 22xOutputs. Ideal for pump control, instrumentation, monitoring of temperature, automation tasks etc.
GC1288-4G	Our most capable unit, with everything the GC0641 has to offer, plus a 5 YEAR guarantee! It also supports analog expansion, GPRS/LTE functionality and variables. Providing you with 128 behaviour statements, expandable to 32xInputs / 32xOutputs. For the professional that insists on the best and the most capable..
GC0328-4G	Supports basic functions, including limited GPRS/LTE capabilities. Does not support analog expansion or variables. Provides 32 behaviour statements, expandable to 12xInputs / 12xOutputs. Ideal for status monitoring and basic control applications.
GC0108-4G	FULLY COMPATIBLE with Smartsetup Software! NOW WITH 2 x Inputs, 2 x Outputs. Not expandable. Supports basic functions, including limited GPRS/LTE capabilities. No temperature or Analog inputs. Provides 10 behaviour statements. Perfect for those applications where you need to do one simple thing only, and do it well..

READY-TO-MOUNT BOXES

Why choose a "Ready-To-Mount"?

If you have ever assembled a complete panel with all the bells and whistles, then you know what real pain is. You will have found how expensive all the bits and pieces can be once they are all on the table, and how difficult it can be to make all those bits fit into a reasonably sized box.

From our experience this is too difficult, too expensive and it takes too long.. So we made it easy for you!

Here are 2 options that are ready-to-go, and ultra-compact.

PICO BOX: Ultra-Compact
